Abstract (en)
[origin: EP0484585A1] In a paraglider which is for gliding in the air and has a wing which is made of a cloth and into which the air is taken through air intake ports to inflate the wing to a proper wing-like form, one or more wing flatteners are attached to an upper side and/or a lower side of the wing so as to cover recesses formed in the upper side and/or lower side, thereby flattening the wing. <IMAGE>
