Abstract (en)

[origin: EP0485014A1] In a mixer (1) having adjacent vertical bins (2), provided with a duct (4) for supplying the material in a current of air, the feed direction of the material slopes upwards and the bins (2) are of a height gradually increasing in the feed direction of the material. The angle of inclination is preferably between 10<o> and 70<o>. The material is delivered to the mixer by a fan (11) and arrives in the various bins (2) with substantially the same degree of compaction. <IMAGE>
