Abstract (en)

Said assembly comprises a fixed or rigid frame section member (1), including a box-like body, having, on a side thereof, a first guide rail (3) and, on another side thereof, seats for engaging affixing means (4) to provide a firm coupling with the rigid or fixed structure. Laterally of the box-like body there is provided a further body coupled to the box-like body through the interposition of thermal insulation means (6), the further body including at least a second guide rail (10). <IMAGE>
