Abstract (en)

[origin: WO9102433A1] A paging receiver (10) is provided which digitizes and stores received analog voice messages. The stored voice message may be retrieved by using a first switch (56) for a normal playback mode, or by using a second switch (61) for a fast forward and fast reverse playback mode. A keyboard (53) may be provided for random access message retrieval for both normal and fast playback modes. A third switch (53) may be provided to enable user selected retrieval of particular portions of one or all stored voice messages.
