Abstract (en)

[origin: WO9101661A1] A means which functions to improve the fit of shoes is described whereby the shoe is urged forward on the foot to minimize slippage of the backpart of the shoe relative to the heel of the wearer's foot.

Abstract (fr)

On décrit des moyens qui servent à améliorer l'adaptation de chaussures au pied de l'utilisateur. La chaussure subit un mouvement de poussée vers l'avant afin de minimiser le glissement de la partie arrière de la chaussure sur le talon de l'utilisateur.
