Abstract (en)

[origin: WO9102045A1] Aqueous anionic tenside concentrates containing (a) at least 30 wt. %, referred to the aqueous concentrate, of anionic tensides belonging to the group of water-soluble salts of alkyl aryl sulphonates, alkyl polyglycolether sulphates, alkyl aryl polyglycolether sulphates, alkyl polyglycolether sulposuccinates, alkyl aryl polyglycolether sulposuccinates, alkyl sulphates and alkyl sulposuccinates and (b) oleic acid sulphonates have an appreciably lower viscosity than, but the same surface active effect as, concentrates without oleic acid sulphonates.
