Abstract (en)

[origin: EP0485788A1] The rotary offset printing machine for sheets has a plurality of colour printing units (I, II, III) in series construction and is intended for printing sheets on one side or by perfecting and has a sheet-feeder for the sheets to be fed to the printing units and a printing or finishing unit (10) connected upstream of the colour printing units. A tumble device is arranged as an additional turning device between this printing or finishing unit and the colour printing units in the running direction of the sheets to be printed. <IMAGE>
