Abstract (en)
[origin: EP0485806A2] There is disclosed a superconducting microwave component comprising a first substrate (2) of a dielectric material with a conductor line (1) of an oxide superconductor formed in a required pattern on the surface a second substrate (6) of a dielectric with a grounding conductor (5) of an oxide superconductor formed on the surface and a third substrate (4) of a dielectric which is laid on the first and the second substrates with the third substrate sandwiched between the first and the second substrates (2,6) <IMAGE>
