Abstract (en)

A double-purpose motor vehicle (1) is able to move both along roads and along rail tracks, particularly railway tracks. According to the invention, the vehicle (1) comprises suction means (10) able to assume at least three working positions, in one of which they cooperate with the road and in another of which they cooperate with the rails (6), means (25, 41) being provided to enable said suction means (10) to undergo guided movement in correspondence with a bin-type body (8) associated with the vehicle (1) to which said suction means (10) are connected. <IMAGE>
