Abstract (en)

A panelling assembly, e.g. for a ceiling, in which a plurality of inverted channel section panels 28, each having a lower web, upstanding side flanges and deflected rims to the side flanges, are supported on lugs formed on at least one pair of first elongate carrier members 12, 14, 16, 18. The structure is rigidified by second carriers 30, 32, 34 which extend perpendicular to the panels 28, and also provided with holding tags engaging the rims of the panels 28. <IMAGE>
