Abstract (en)

Photographs (B) and negatives (C) are stored within the device (A) so that at least one of the photographs is visible through a transparent window (B). Various flaps (2, 3, 4, 5) may be folded on top of each other to minimise the volume of the device (A) for storage purposes. Alternatively, wing portions (6, 7) may be used to hold apart the flaps (2, 3, 4, 5) to form the device (A) into a display stand. <IMAGE>
