Abstract (en)
[origin: EP0486408A1] This device comprises a stopper (3) which is mounted in a non-reversible manner on the neck of a receptacle and the opening of which is carried out by tearing, and a safety cap (4) mounted on the stopper and fixed thereto by returns (24) towards the inside which are engaged behind a lip (16) projecting radially from the stopper towards the outside, the number and the shape of the returns (24) corresponding to those of cutouts (17) made in the lip (16). Application to the closure of receptacles containing dangerous products. <IMAGE>
