Abstract (en)

[origin: EP0486784A2] Conventional liquid dishwashing agents are predominantly produced on a petrochemical basis and have the disadvantage of incomplete biodegradability. A liquid, foaming detergent which has all the beneficial properties of conventional dishwashing agents while, at the same time, being well tolerated by skin and very environmentally compatible is now proposed. The surfactant ingredients are 5 - 40 % alkyl polyglycoside and 0.1 - 2.9 % anionic surfactant and 0 - 3 % other surfactants.
