Abstract (en)  
The present invention relates to a passive band-pass filter produced from micro-strips deposited on a first face of a dielectric substrate and including at least three resonators (1, 2, 3), characterised in that each resonator has a trapezoidal general shape and in that the directrix line of a longitudinal edge of a resonator (1, 2) is parallel to the directrix line of the longitudinal edge of the resonator (2, 3) which is adjacent to it. <IMAGE>

Abstract (fr)  
La présente invention concerne un filtre passif passe-bande réalisé en micro-bandes déposées sur une première face d'un substrat diélectrique et comportant au moins trois résonateurs (1,2,3), caractérisé en ce que chaque résonateur à une forme générale trapézoïdale et en ce que la ligne directrice d'un bord longitudinal d'un résonateur (1,2) est parallèle à la ligne directrice du bord longitudinal du résonateur (2,3) qui lui est adjacent. <IMAGE>
