Abstract (en)

[origin: WO9103005A1] A method of processing a photographic material comprising a support bearing at least one swellable layer which method comprises contacting the material with a processing solution containing a component which limits the swell of the layer so that its take-up of processing solution components is controlled by the degree of said swell.

Abstract (fr)

Procédé de traitement d'une matière photographique comprenant un support sur lequel repose au moins une couche pouvant se gonfler, lequel procédé consiste à mettre en contact la matière avec une solution de traitement contenant un composant limitant le gonflement de ladite couche, de sorte que son absorption de composant de la solution de traitement est régulée par le degré dudit gonflement.
