Abstract (en)
In comparison with the main application, the object is, while maintaining the main direction in which the main application is aimed, to make the building element lighter and at the same time increase in particular the modulus of elasticity. This is performed on the one hand by a foam layer bond to the solid outer shell regions 12, 13 and mats 22, 23 laid therein. <IMAGE>

Abstract (de)
Gegenüber der Hauptanmeldung besteht die Aufgabe darin, unter Beibehaltung der Hauptzielrichtung der Hauptanmeldung das Bauelement leichter zu machen und dabei vor allem den E-Modul zu erhöhen. Dies geschieht einerseits durch eine Schaumstoffschicht-Verbindung mit den massiven Außenschalenbereichen 12, 13 und darin eingelegten Matten 22, 23. <IMAGE>
