Abstract (en)

The present invention relates to a packing case (1) for panelable electrical appliances, comprising a parallelepiped shaped external container with a square or rectangular base, a supporting base (2) for the appliance and protective angular sections (5a,5b,5c,5d). The principle characteristic of the invention is constituted by the fact that on at least one face of the parallelepiped shaped external container means are provided that consent internal access with the aim of panelling the door of the appliance without having to remove the packing case. <IMAGE>
