Abstract (en)

[origin: EP0488896A1] Electrical plug for connecting two elements (101, 102) of an electrical cable (100), having two pins (201, 202) each of which has a connection means (211, 212), the said pins being fitted into two housings (301, 302) arranged in an insulating insert (300) and the said plug comprising an intermediate insulating body (shell) (400) covering the said insert and intended to receive an outer insulation overmoulding (500). According to the invention, the said body (shell) comprises means (421, 422, 423) for the lateral insertion of the body (shell) over the said cable. Application to the general field of connectors, and in particular to that of two-pole and two-pole + earth plugs. <IMAGE>
