Abstract (en)

[origin: EP0488901A1] Machine for driving stoppers into containers, comprising a rotary tray (10) comprising, at its periphery, cavities (18) for housing the containers and parts (26) for receiving and positioning the stoppers, which are fastened on the tray (10) above the cavities (18) and which are aligned with the parts of the containers intended to receive the stoppers. This machine permits automatic positioning and centring of the stoppers relative to the containers before the stoppers are driven in. <IMAGE>
