Abstract (en)

[origin: EP0489981A1] The invention relates to a key bracelet for use at swimming pools, consisting of an elastic ring (1) to which the key (2) is hinge-connected at one point, on which bracelet a housing (3) is provided for receiving the free end of the key (2), the distance between the point at which the key (2) pivots relative to the bracelet and the abovementioned housing (3) being measured such that, when a pulling action is exerted on the ring, at least between the abovementioned point and housing, the end of the key (2) is located outside the housing (3) whereas, in the normal position, the said free end of the key (2) is located inside the housing (3). <IMAGE>
