Abstract (en)
[origin: EP0490331A2] The air refrigeration unit comprises a box-like body (1,2) in which an evaporator (3) is arranged between other refrigeration devices and fans (7). The evaporator (3) and the fans (7) are arranged in a channel (4) adapted for conveying ambient air. The unit according to the invention is characterized in that a channel (12) is defined therein which connects a region located downstream of the evaporator (3) to an opening (14) from which outside replacement air is drawn. <IMAGE>
