Abstract (en)

[origin: EP0491146A2] In a kitchen hood, with a housing receiving an air conveying device and the like, the intake opening of which housing can be modified by adjusting air guide devices arranged movably thereon, such as flaps, drawer-like pull-outs and the like, the degree of collection is improved by an additional blower (17) assigned to the movable air guide devices (15), which blower can be connected to the air conveying device of the appliance. <IMAGE>
