Abstract (en)

[origin: EP0491162A2] For an orbital sander (1) with a housing (17) provided with a handle (19) and a motor (21), fitted in the said housing, for driving a sanding plate (3) which is movably coupled to the housing (17) via at least one elastic connecting part (13, 15) and which, to transmit the orbital movement of the motor (21) to the sanding plate (3), carries a bearing location ring (27) as well as a clamping device (7) for abrasive paper (5), the object of reducing the manufacturing costs while improving the product quality is achieved in that at least one connecting part (13, 15) is integrally formed and fastened to the sanding plate (3) by a cast bond. <IMAGE>
