Abstract (en)

[origin: EP0491249A2] A socket support (10), which can be installed in a light, for at least one socket for holding a two-pin base fluorescent lamp has a supporting wall (11) on which a housing lower part (15) for holding contact elements is integrally formed. A housing lower part (16), which can be snapped onto the supporting wall (11) of the socket support (10), is provided to complete the housing for holding the contact elements. <IMAGE>
