Abstract (en)  
[origin: US5195904A] The invention relates to a quick locking and unlocking coaxial electrical connector having two connector elements and a peripheral release sleeve. One of the connector elements (2) has an elastic external contact socket (9) which has a diameter corresponding substantially to the diameter of the annular wall (24) of the peripheral release sleeve (23), the elastic socket having a front end disposed within an annular recess (12) of the body (10, 11) of the connector element, the connector having an elastic keeper provided with inclined portions (21, 22) projecting radially outwardly and disposed between the confronting ends of the elastic socket and of the annular wall of the peripheral sleeve.
