Abstract (en)
[origin: WO9201321A1] The invention relates to a plane collector for an electrical machine with radial commutator blades arranged on an electrically insulating carrier. On the electrically insulating carrier (10) is fitted a solderable or weldable plate (11), dividable in segments (11') with connections (17), which has segments congruent with the commutator blades (15). The commutator blades (15) are soldered or welded to the plate (11).
