Abstract (en)

[origin: EP0492259A1] A method for the treatment of small-sized material, in which the long parts are separated off by brushing from a solid mixture containing long parts, permits a high recovery rate of useful mixture components. In order to separate off the long parts from the granular portion of the solid mixture, at least one brush (11, 11', 11'') is assigned to a conveyor (3) and matched to its width. <IMAGE>
