Abstract (en)

The invention relates to the protection of documents against tampering. It relates more particularly to a tamper-proof laminated document comprising a support (1) having a marked zone (2) with two sides (2a and 2b) carrying information (3b) which forms reliefs (3a) on one of its sides (2a) and indentations (3b) on its other side (2b) and comprising a hologram (4) bearing an image formed by holographic interferences, covering at least part of the marked zone (2). The hologram (4) is attached to the side (2b) of the marked zone (2) bearing the information that forms the indentations. An adhesive layer (5) fixes the hologram (4) to the marked zone (2). <IMAGE>

Abstract (fr)

L'invention concerne la protection des documents contre la falsification. Elle concerne plus particulièrement un document infalsifiable stratifié comportant un support (1) ayant une zone de marquage (2) ayant deux faces (2a et 2b) portant des informations (3b) formant des reliefs (3a) sur l'une de ses faces (2a) et des creux (3b) sur l'autre de ses faces (2b) et comportant un hologramme (4) porteur d'une figure d'interférences holographiques, recouvrant au moins partiellement la zone de marquage (2). L'hologramme (4) est fixé sur la face (2b) de la zone de marquage (2) portant les informations formant des creux. Une couche d'adhésif (5) assure la fixation de l'hologramme 4 sur la zone de marquage (2). <IMAGE>
