Abstract (en)
[origin: EP0493600A1] A stacker for transferring and recovering a plurality of works formed of a fabric in an external apparatus. Works are each held at a plurality of positions spaced apart from one another and transferred by a roller conveyor (1). A table (102) facing the conveyor (1) from below supports the works conveyed by the conveyor (1), moves away from the position opposing the conveyor (1) when a work is conveyed to a predetermined position, and lets the work fall onto a receiving tray (105). <IMAGE>
