Abstract (en)
[origin: EP0493697A2] A device (10) for stamping fired ceramic products is described which has a stamping apparatus (24) which is adjustable between an ink-receiving station (40) and a stamping station (36) situated on a transporting apparatus (12) for the products (20) to be stamped. In order to be able to stamp unglazed ceramic products as well without problems using such a device, a stamp-cleaning station (38) is provided between the stamping station (36) and the ink-receiving station (40).
