Abstract (en)
In a paving machine an extension screed plate (8) is carried on an assembly supported on a guide tube (6), the weight of the assembly when clear of the ground is carried by pressure pads (17, 18), bearing on a pair of rails (4, 5) carried by the main screed plate (7) assembly and immediately adjacent to the guide tube (6). A pressure pad (19) on the main screed plate (7) assembly bears on a rail (12) on the extension screed plate assembly and supports the assembly against the reaction of the ground forces in operation. <IMAGE>
