Abstract (en)

[origin: WO9104905A1] The invention relates to a method and a device for moving a torpedo (10). A loading means (14) releasably connected to said torpedo engages a movable driven carrier (16), which is moved towards a torpedo tube (11). A part of said loading means (14) connected to said torpedo is released from engaging said carrier (16) and engages a rod (18) projectable from a guideway, said carrier again being moved towards said torpedo tube. The movement of said carrier is conveyed to a linear movement of said rod (18), which is projected from said guideway.
