Abstract (en)

[origin: CA2059043A1] 7863 MR A cellulosic solution in a amine oxide and water is forced through an elongated orifice passage having a minimum length of 1000 .mu.m and a minimum diameter along the length which is up to 150 .mu.m 50 that fiber characteristics are imparted to the emerging strand which passes through an air gap of at the most 35 mm in length into the coagulating solution.
