Abstract (en)

[origin: WO9202909A1] The equipment comprises a console (10) with a screen (12) and a control panel (13), and a microcomputer for processing instructions entered through the control panel (13) and transmitting them in part to the screen (12) and to a printer which prints the typeset text on a data medium, said microcomputer being further designed to control the whole of the equipment and the interaction thereof with the user. Said equipment is characterized in that the printer is a graphic-type printer; in that the actual composition of the text to be printed is controlled by customized software loaded into the microcomputer's memory; and in that the whole of said text is composed in advance by the user using said software (50) before being printed.
