Abstract (en)
[origin: EP0495164A2] A device for processing cable harnesses, consisting essentially of a worktable with a worktop and a movable cable support with a retaining part and a base, the invention is that the worktable 2 has a computer 12 with a screen 13, a keyboard 14 and a diskette drive 15, an automatic device for insulating stripping, an automatic fitment aid, a clamping device and an automatic crimper 11, a recess for the column 23 of the cable support 4 being provided on the rear edge of the worktop 5. <??>In this case, it is especially advantageous that a more economical production sequence is achieved with a smaller space requirement, and production defects are largely prevented. <IMAGE>
