Abstract (en)  
[origin: EP0495177A1] The object of the present invention consists in providing an apparatus for mounting a shelf or optionally the most varied commodity goods on a wall. According to the invention, a wall mounting device is provided for this purpose, having a retaining profile strip (10) which can be attached to the wall and has a U-shaped web with fixing holes, which can be attached parallel to the wall, an upper U-shaped flange (12), which is connected at the upper end to the U-shaped web and is approximately perpendicular thereto, a lower U-shaped flange, which is connected to the lower end of the U-shaped web and is arranged approximately perpendicular thereto, an arm, which is arranged in extension of the lower U-shaped flange, is bent slightly obliquely upwards and projects beyond the upper U-shaped flange (12) in the plan view, and a support web (20), which is formed at the end of the arm, having a flat support surface. A so-called functional profile strip (21) can be attached to the retaining profile strip (10), which functional profile strip has a groove (25) on the underside which is suitable for receiving the support web (20) of the retaining profile strip (10). <IMAGE>
