Abstract (en)
[origin: EP0495359A1] A plug socket box having an elongated plastic housing which is formed from a bottom cover (1) and a cap-shaped upper part (2) which is detachably connected thereto, in which housing one or more plug sockets and/or switches and/or safety chassis and/or communications inserts and at least one plug connector (6), which is electrically connected by means of built-in wiring, are arranged. The plug sockets and/or switches and/or safety chassis and/or communications inserts are surrounded on the access side by a covering frame (7) which is held detachably on the upper part (2). On the upper part (2), the plug-device supporting plates (8, 9) are integrally formed in the pot-shape or plate-shape of the plug sockets (3) and/or switches and/or safety chassis (4) and/or communications inserts (3), and these plug-device supporting plates (8, 9), which are integral with the upper part (2), are gripped by the covering frame (7) which is latched thereto. <IMAGE>
