Abstract (en)

A data display radio pager having a timepiece function and allowing the user of the pager to perform various kinds of time setting operations on a single operation switch (B). The pager has a single switch, time counting means (C), time changing means (D), time component replacing means (E), time set mode starting means (C), and time set mode ending means (G). The radio pager, therefore, can replace a component of time to be changed, increase or decrease the component of interest, and set up and end a time set mode, by the single switch (B). <IMAGE>
