Abstract (en)

[origin: WO9202280A1] A kit of articulated pieces has on the one hand a cross-shaped neck-shoulder element (1) made of pieces of round wood (6, 7) which comprises the neck (2) and shoulder joints (3, 4) and on the other hand foot joint elements (31, 32). Each joint (2, 3, 4) in the neck-shoulder element (1) is formed by a closed eyelet (13, 15, 16) through which is threaded a loop (12, 17, 18) whose free ends are secured to one side of the joint. The hip joint is formed by a hem (27) into which is inserted a piece of round wood (28). The foot joints are formed of pieces of round wood (31, 32) provided on their bottom side with a slit (33, 34) in which swings an eye bolt (35, 36) that is retained by a cross nail and that can be screwed into a wooden foot or shoe (37, 38).
