Abstract (en)

[origin: WO9105978A1] Prior art driers and especially intermediate driers still take some considerable time to dry the various items (7). In order to shorten drying times considerably and improve the drying process, it is proposed according to the invention to arrange the necessary lamps (F, G, H) in a drier array in a mutual grid pattern whereby, if tubular lamps (F, G, H) are used, they are preferably arranged in staggered array in two planes. The drier is particularly suitable for drying printing inks.
