Abstract (en)

A feeding and delivery structure for a cutform medium (4) for use in a printer having a feeder (1) positioned upstream of a platen (5), includes rollers (9, 10) disposed adjacent to the platen (5), a stacker having a curved bottom face member (11) for storing delivered cutform media (4), guide plates (2) positioned adjacent the feeder, and guide members (3) slidingly attached to front faces (2a) of the guide plates (2) for guiding a manually fed cutform medium. The guide members (3) form a surface (3a) of the stacker, and may have ribs (12) formed thereon to decrease the carrying load of the cutform medium (4) after it is conveyed through the rollers. <IMAGE>
