Abstract (en)

[origin: EP0497661A1] The anti-theft switch includes a casing (11) furnished with a bottom (42), fixed contacts (16, 19, 20, 21, 22), a rotary rotor (8), a slider (9) rotationally tied to the rotor (8), and movable contacts (61) integral with the slider (9) for cooperating with the fixed contacts (16, 19, 20, 21, 22). The fixed contacts (16 and 19 to 24) are mounted raised up relative to the bottom (42) of the casing (11). Some at least of the fixed contacts (16, 19 to 24) are shaped so as to overhang the bottom (42) of the casing (11) and create a clearance. The bottom (42) of the casing (11) is furnished, on the one hand, with thickenings (80) with each of which is associated at least one hollowing (49) and, on the other hand, with passages (46). Some at least of the said fixed contacts (16, 19, 20 and 22 to 24) have a first tab (91) furnished with fastening means (47) for anchoring into a said hollowing (49), and a second tab (92) furnished with fastening means (47) for anchoring into a said passage (46). <IMAGE>
