Abstract (en)
The present invention relates to a glass heating panel characterised in that it is provided, on one of its faces, with a resistive homogeneous bottom layer (1) serving as a heating circuit and with supply terminals or with conducting strips (3) for connecting or soldering conductive wires (4), the bottom layer (1) and, optionally, the conducting strips (3) being covered with an insulating facing layer (5). <IMAGE>

Abstract (fr)
La présente invention concerne un panneau chauffant en verre, caractérisé en ce qu'il est pourvu sur l'une de ses faces d'une couche de fond homogène résistive (1) servant de circuit chauffant et de plots d'alimentation ou de bandes conductrices (3), pour un raccordement ou un soudage de fils conducteurs (4), la couche de fond (1) et, éventuellement, les bandes conductrices (3) étant recouvertes d'une couche de revêtement isolant (5). <IMAGE>
