Abstract (en)  
[origin: EP0497750A1] The present invention relates to a bench for ground level low surfaced work comprising a substantially J-shaped profiled frame (1), which is provided at its ends respectively with a transversal knee (2) and seat supporting panel (3) provided with foam material or the like. The knee supporting panel (2) is hingedly connected to the frame (1) by hinge means (5). The bench comprises moreover belts (8, 9, 13) adapted to fix the user's knees, feet and body to the bench. The bench according to the invention allows to reduce or avoid physical pains when performing work at ground level. <IMAGE>
