Abstract (en)
[origin: EP0498019A1] An earth conductor connecting terminal, which has a tension bracket (1) and a compression bracket (2) for clamping onto the rail edges of a supporting rail (3), the tension bracket (1) and/or the compression bracket (2) being electrically connected to conductor connecting terminals (4). It is provided that the tension (1) and/or compression bracket (2) is of resilient design and is under the influence of a clamping screw (5) whose tightening movement is limited by a stop (6). <IMAGE>
