Abstract (en)
[origin: WO9106622A1] A liquid detergent composition comprising a dispersion of lamellar droplets in an aqueous continuous phase and a block copolymer consisting of alternating hydrophobic and hydrophilic groups, wherein the equivalent composition, minus the polymer has a significantly higher viscosity and/or becomes unstable.

Abstract (fr)
Composition détergente liquide comprenant une dispersion de gouttelettes lamellaires en phase aqueuse continue ainsi qu'un copolymère en masse constitué de groupes hydrophobe et hydrophile alternés, dans laquelle la composition équivalente dépourvue de polymère a une viscosité sensiblement plus élevée et/ou devient instable.
