Abstract (en)

Tile of clay, in different colours, with double trapezoid front side of dimensions 437 X 254 mm und height 91 mm, and dimensions of the trapezoid part 54 mm at the base and 90 mm at the above seat, where it bears two reinforcing prominences of length 350 to 370 mm for its straight lined placing and mainly for the fastening of the one on the other during the forming of the roof, which takes place by placing tiles in perpendicular rows. This tile has three water-exits and consequently a reduced absorption, even in its perpendicular setting, with result that it is more durable in unfavorable weather-conditions. <IMAGE> <IMAGE>
