Abstract (en)

[origin: EP0500449A1] Elongate member insulated by means of an insulating jacket, the said jacket consisting of a tape (2) made from a synthetic material taped around the said body (1) and covered with a layer (11) of varnish made from a synthetic material, characterised in that the taping is such that a groove (4) exists between the free edge (5) of every turn part (3) which is not overlapped by the following turns and the surface (6) not overlapped by the preceding turn, the width of the said groove (4) lying substantially between 0 and 5% of the width of the said tape (2) and strictly greater than zero. <IMAGE>
