Abstract (en)
[origin: WO9107092A1] Methods and compositions employing poly(alkyl and alkenyl phosphate)s and/or their thiophosphate derivatives are provided for treating viral infections. Preferably, polymers of the invention 20-30 monomers in length are used alone or in combination to treat HIV infections.

Abstract (fr)
Procédés et compositions employant des polyphosphates d'alkyle et d'alcényle et/ou leurs dérivés de thiophosphate afin de traiter des infections virales. On utilise, de préférence, les polymères de l'invention d'une longueur de 20 à 30 monomères, seuls ou combinés afin de traiter des infections dues au VIH.
