Abstract (en)

[origin: EP0501935A1] The present invention relates to an apparatus, including a safety device, for handling motor vehicles in multiple parking-floor parking systems, which apparatus comprises a pallet or frame (1) for supporting a motor vehicle, the supporting frame (1) being provided with wheels (6) and including a central rod (5) which longitudinally projects from the frame (1), the central rod (5) being removably engaged by driven rollers which are supported by swinging jaws associated with a handling bar or rod which can be displaced so as to engage and disengage the jaws of the central rod. <IMAGE>
